

# Ladder Towel Warmer

## A Simple, striking look with either a straight or curved design

Ladder Towel Warmer rails come in a choice of two design variations - straight rails or a subtle curved look. Both variations are available in six different sizes and outputs to suit any bathroom or en-suite and each is offered in either a chrome or white finish. You also have the option of an electric heating element, so you can use your towel warmer even when the central heating is off.

The range also includes the mini towel warmer at only 700 x 400mm. You can add a touch of luxury in even the smallest places.

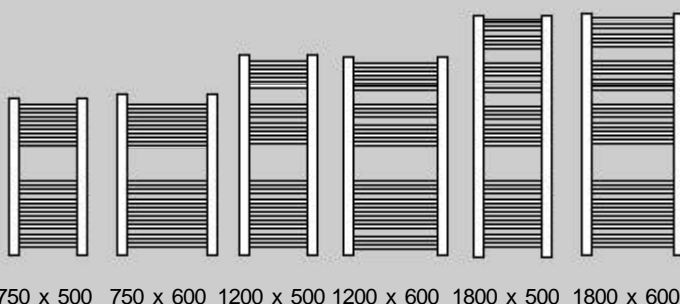

### Ladder Towel Warmer Straight

Finished in white (RAL 9010) or Chrome. Matching manual or thermostatic valve kits available.

Product	Height (mm)	Width (mm)	Btu/h* △ t60	Watt* △ t50	Tapping centres	Centres from wall	Maximum projection	Element rating
